Projects

Chubb Insurance Project Cognizant : Current

I am working on the downstream application of an insurance project where the user's data about the insurance policies were being processed and stored in the end database system. I am responsible for all the minor and feature enhancement work and should complete the deliverable for web apps, web service, and Windows service in the Asp.net, C#, and SQL Server tech stack. Responsible for guiding the team for the automation-related tasks in the C#

Online Movie Ticket Booking System with OTT Feature Cognizant : Aug 2021

Online Movie Ticket Booking System is a web application that can be used to book tickets for a movie. The main objective of our project is to design a web application that caters to ticket sales for movies, plays, concerts, etc. The web application will also act as an over-the-top (OTT) platform so that the user can view the streaming content which is available for the subscribed users. Through this application, the users can experience the movie in the theatre as well as at home.
